SEGUIN GROUP FRENCH MANUFACTURER AND TRAINING CENTER AT CUSTOMER SERVICE

Group Seguin has more than 120 people working in Seguin head company in the Auvergne region and its 2 other production units: JC bordelet (in Montpellier, FR) and Axis steel fireboxes (in Belley, FR).

Group Seguin has a strong network of dealers in France and worldwide, active on all the segments of the market, providing high quality products in technology and design.

As a strong milestone of Group Seguin development, the training center (located in Randan, FR) services a hundred of trainings every year, on the products, their installation and use. This professionalization is enhanced in 2016 with the 400 square meters extension of the training center .Group Seguin and its dealers have established strong relations based upon trust and long-term partnership. Seguin dealers are professional craftspeople and guarantee expertise in Group Seguin products and installations.

SPEETBOX

BY
STARCK®

AN INNOVATIVE AND ENVIRONMENTALLY-FRIENDLY HEATING CONCEPT SUITED TO YOUR NEEDS

An innovative and high performances wood-burning stove

SPEETBOX BY STARCK heating furniture revolves around an airtight wood-burning stove, fitted with a steel hearth offering rated power of 5.5 kW.

It has been designed to work with or without electricity. The SPEETBOOSTER electronic start assist system optimises combustion and heat delivery, thanks to a fan blowing underneath the ambers.

The electronic pilot of the fresh air entries and the automatic blower inside the accumulative box provide a modulation of the power and an optimisation of the heat delivery.

Customisation at the heart of the SPEETBOX BY STARCK

In addition to the hearth, the collection also consists of two types of cubic modules (50x50 cm) which, associated with the wood-burning stove, provide specific and additional features.

With its almost endless possible combinations of boxes around the wood-burning stove and the versatility of the modules, SPEETBOX BY STARCK is a unique, scalable and highly adaptable heating solution.

2 colors available : black or anthracite grey.

APPLICATION SPEETBOX BY STARCK

The SPEETBOX app- available on iOS and Android - can be used to programme and control the room temperature, hot air distribution, power and speed of combustion or analysis of your stove's flue emission at a distance

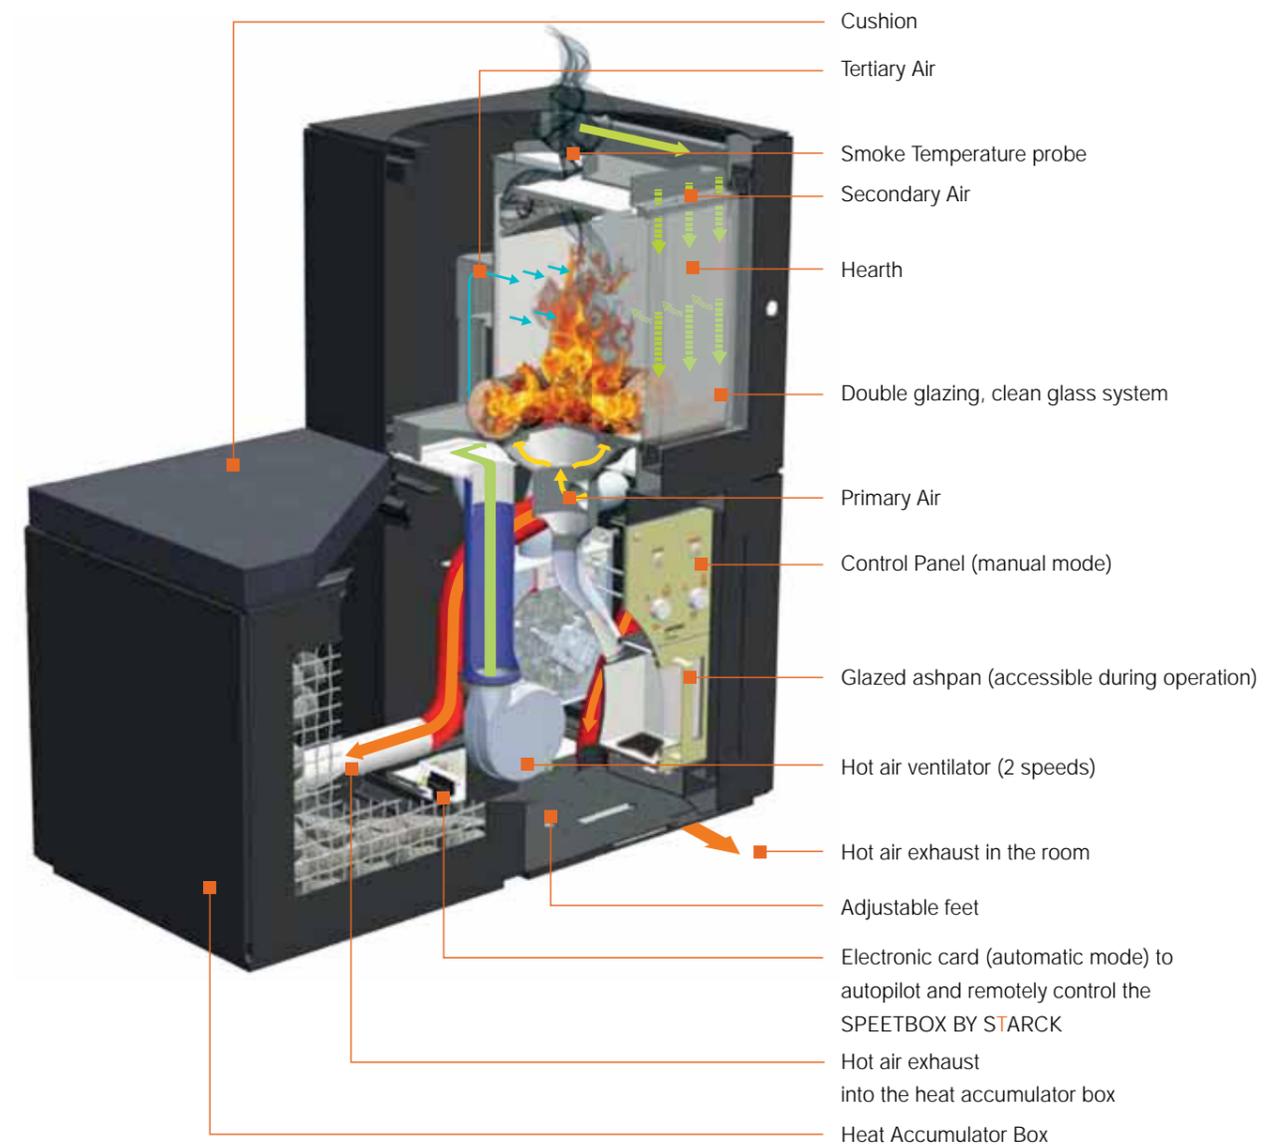

Features of the App:

- + Control of hot air distribution (on/off),
- + Control of the room temperature (optional),
- + Setting of power/speed of combustion,
- + Analysis of flue temperatures (safety),
- + Lighting control,
- + Control of electric sockets (time setting),
- + Update the software of the hearth features.

TECHNICAL BENEFITS

- + RT2012 and low consumption construction compatible.
- + Works with or without electricity.
- + SPEETbooster electronic start assist.
- + Combustion autopilot for enhanced efficiency.
- + Addition of an accumulator box to increase the duration of heat delivery.
- + 1st full integration of a triple-wall pipe (e.g. POUJOLAT®).
- + Double glazing to reduce the risk of severe burns.
- + Clean glass system.
- + Glass ashtray, accessible during operation.
- + 4 side finishing.
- + Scalable in time.

HEARTH WITH TECHNICAL UNIT

Technical information

Compliant with NF EN 13240 standard

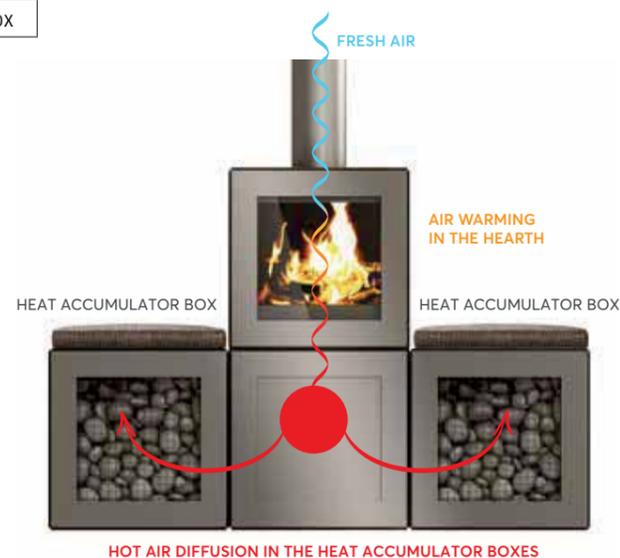

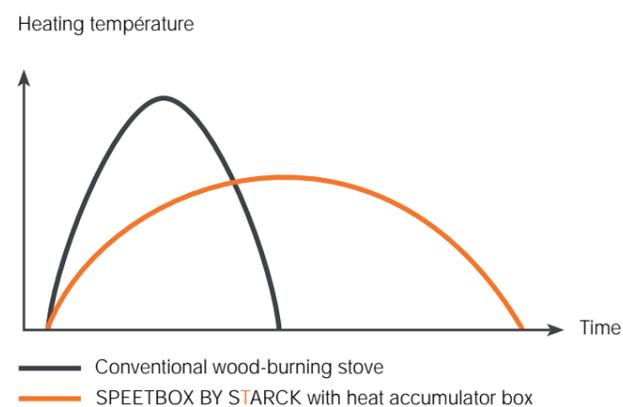

Rated power	5,5 kW
Thermal efficiency	79% (eligible for tax credit)
CO rate at 13% O ₂	0,16%
Dust	30 mg/Nm ³
T° C of flue	309°C
Ember shield	Yes
Firewood	30 cm logs
Combustion chamber	With post-combustion system
Flue mass flow	4,8 g/s
Stove used alone	Air blown under the technical unit
Display of ash level	Yes

Dimensions and materials

Weight	160 kg
Size (width x depth x height)	50 x 50 x 100 cm
Dimension of the door (length x height)	48,5 x 48,5 cm
Fire view (length x height)	34 x 34 cm
Connection to the flue pipe on the top of the appliance	Diameter 150 mm
Connection to the air circuit	Diameter 80 mm
Structure	Steel
Cladding	High temperature paint, enamelled steel or plating
Window	Clean window system Double glazing

AUTONOMY AND HEAT DELIVERY

Type	Autonomy
Fireplace	Few hours
Conventional wood-burning stove	Few hours
SPEETBOX BY STARCK	+ 24h with heat accumulator box

MULTIFUNCTION BOXES

Heat accumulator box

A box with stones accumulates heat during the heating phase and gradually diffuses it for more than 24 hours once the stove has been stopped, in contrast with only a few hours for a fireplace or conventional wood-burning stove.

Heat accumulator box
50 x 50 x 50 cm

Storage box

A storage box has been specially optimised to store and dry wood. However, it may also be used as a stool fitted with a cushion or as a shelf in a composition of several modules where you can store your books and favorite objects.

Storage
50 x 50 x 50 cm

Wood storage
50 x 50 x 50 cm

SPEETA 3D APPLICATION

VISUALISE YOUR FUTURE SPEETBOX AT HOME

Choose its wood burning stove isn't always easy. What is the best choice? What space will it occupy in the room? With the SPEETA app, you can make the correct choice of SPEETBOX BY STARCK, to meet your needs and expectations.

To inspire you, the SPEETA app will allow you to visualise the unit in 3D as if it was in your room. Thanks to a floor target, choose the best place to install your stove. Aiming at the target, the stove coming out on your smartphone or tablet screen, as if it was really in front of you.

You can access to the characteristics of your stove SPEETBOX BY STARCK, choose the kind of module you wish to add and stage it in your room. You can handle it and even turn around to discover it from every angle. The application allows also to share easily your configurations images with your friends or family, on the social medias.

You'll never have been so sure of your choice!

Download the SPEETA app, position the brochure on the floor, right page on the top, and view your future wood burning stove in your room!

The appliances comply with the European norm EN13240

A French fabrication and know-how

A 100% French manufacture... in Rhone Alps Auvergne region. Based since the origin in Auvergne region, the Seguin company has proceeded, during the last 10 years, to various acquisitions 100% French, this to become a leader group for wood burning appliances distribution on the national territory, proposing a range among the widest of the market, especially in the wood burning stove field.

Today, the Seguin Group own 2 production units and 3 design offices in Rhone Alps Auvergne region, giving it the advantage to feet with the demand evolutions, as well on the quality level as the regulatory framework.

The user satisfaction... A permanent goal to reach

The group has its own training centre, welcoming more than 300 dealers and installers a year, in a common will to meet the needs and requirements of the future users. Internally, each employee specialised in boiler making and bodywork receive regular trainings.

As the quality and the customer satisfaction is a priority goal, Seguin makes a commitment of a transparent policy and go further: each user has the possibility to share his opinion on the unit and inform the consumers about his experience. All those opinions are published on the website www.cheminees-seguin.com, and are easily searchable.

A brand, values and a strong commitment

The Seguin brand, it's an eco-citizen policy, with raw materials supplier based mainly in the Rhone Alps Auvergne region, and nearly 30 000 installed units a year!

Thus Seguin supports the local industry and energetic resources and is also attached to certain human values. Those values, we have it in common with our dealers, to form a team flying the brand's flag of a French manufacture.

Design and concept... Our goals

Make accessible to the largest possible people, high-quality units, corresponding to the best manufacture and aesthetic standards, within the strict respect of the norms. Through the innovation, meet the end customer's needs, make the units easier to use and more reliables, offer more security, more efficiency and better performances, with a competitive value for money.

For all those reasons, you will find in our range of products, stoves and fireboxes, made of cast-iron or steel, with different outputs and styles. They have common benefits: a better quality of combustion and efficiency than the market's standards, guarantees up to 10 years according to the models, automatic regulation systems or user guides to simplify as much as possible the experience.

Very easy

- 1 *Make your fire ignition as usual*
- 2 *Adjust the temperature to the desired degree*
- 3 *Your Smartphone or tablet warns you when it's necessary to feed the fire*

Benefits

The IHS SmartControl™ system makes life easier. You just have to light the fire and adjust the setpoint temperature on your smartphone or tablet. The IHS SmartControl™ system intelligently pilots the air admission and ensures optimally its distribution thanks to the electronic regulation of 3 independent air intakes. Optimal combustion, environment-friendly and energy savings.

How?

Oxygen probe and temperature sensor.

The temperature of the combustion chamber and the oxygen volume are constantly controlled, and the data are forwarded to the pilot system.

Airbox

The air volume is generated by the Airbox through three independent fresh air intakes.

The system is regulated according to the ambient temperature, the temperature inside the combustion chamber and the oxygen volume into the smokes.

Optional remote control

Substitute the smartphone application if necessary.

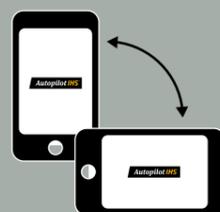

STOVE 700 IHS
Bench base
Ref.: PO0700IHS

USE YOUR SMARTPHONE OR TABLET TO MANAGE YOUR STOVE

Couple with an ambient thermometer, the «IHS Smart Control™» application allows you to easily adjust the ambient temperature from your smartphone or tablet (Apple Store and Google Play). The application warns you when it's necessary to feed the fire again. The only thing you have to do is to start the fire, and then close the door. Nothing more to do, the stove manage everything itself.

THE BENEFITS

- Unit managed through the smartphone application couple with a distant thermostat.
- Automatic start of the application thanks to a door opening sensor.
- Automatic opening of the dampers during the wood loading, thanks to the door opening sensor, to prevent any smoke leakage.
- Possibility to program a night mode to reduce the wood consumption.
- Dynamic updates through the app (no need to make the updates with a computer, except in case of after-sale service)
- Access to the combustion graphs by pivoting the unit
- Optional backup battery in case of power cut.
- Possibility to connect up to 11 tablets of smartphones to the unit.
- Possibility to connect it directly to the Internet boxes.
- Compatible with home automation system

IHS-SmartControl™ the most advanced and performant system on the market

SIMPLICITY

The stove manages itself

COMFORT

The stove regulate itself according to the setpoint temperature

WOOD CONSUMPTION

Up to 50% less than a traditional stove

PERFORMANCE

Efficiency up to 83.4%

ECOLOGY

The IHS system analyses in real time the smokes quality, and limit as much as possible the emissions in the atmosphere

Tradition & innovation

Why choose Vermont Castings?

Vermont Castings offers you a high-performance heating, simultaneously innovative and timeless. Each unit is designed to face harshest Canadian's and American's winters, and accompany you over time: trim design, cast-iron and assembly quality. Performances close to the excellence, simplicity and flexibility of use, your Vermont Castings stove will find its place for all occasions.

The Vermont Castings stoves allow thanks to the catalytic combustion and great load capacity, one of the most extended burn time on the market (overnight*) Pleasure of the fire or high-efficiency and maximal autonomy, Your Vermont Castings stove offer you the best of the fire with a perfect flexibility.

* Combustion autonomy without reloading in comparison with other units.
The exact autonomy depends on the fuel quality and flue pipe characteristics.

Open-door operation

Your Vermont Castings stove can turn into an open and hearty stove to sublimate your winter nights (fireguard option available).

The accessories

Hotplate

Tablemats

Our cast-iron tablemats are a perfect add-on to your stove. Perfect to enhance it! Available in all colours.

Enamelled kettles

Our enamelled kettles are designed to humidify the surrounding air, creating a more comfortable atmosphere. Caution: our kettles aren't designed for a culinary use.

Fireguards

Especially designed to be compatible with your Vermont Castings stove with open doors. Your fireguard avoids piece of grit spatter. Available for the units Intrepid II and Defiant.

Thermometer

The thermometer allows you to adjust the air admission controls and inform you when it's necessary to feed the stove or close the damper.

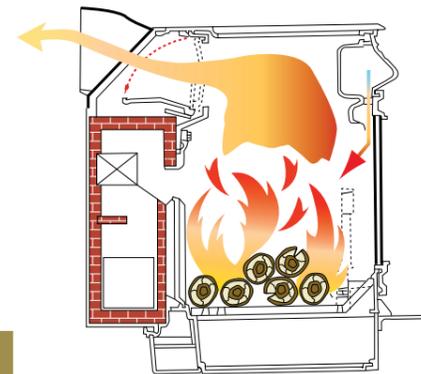

The catalytic combustion

The exclusive system of catalytic combustion make your Vermont Castings stove a performance champion.

- **Fuel savings up to 35%**
- **Clean combustion** = low emissions in accordance with the strictest European norms
- **Cleanliness of the flue pipe:** security and easier maintenance
- **Autonomy** and longer burning term

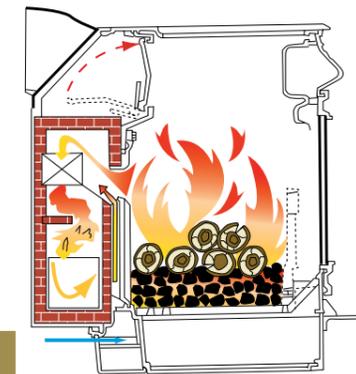

Catalytic combustion
Vermont Castings

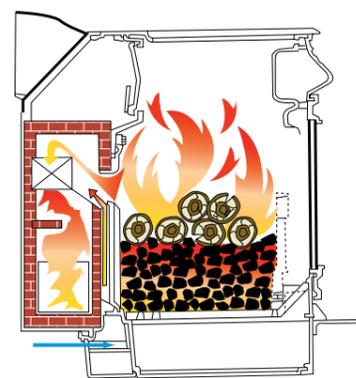

1

The damper is opened, the thermostat is adjusted in order to let an important quantity of fresh air coming in. You need to warm us your stove, get a good bed of ambers, and reach a higher temperature than 260°C.

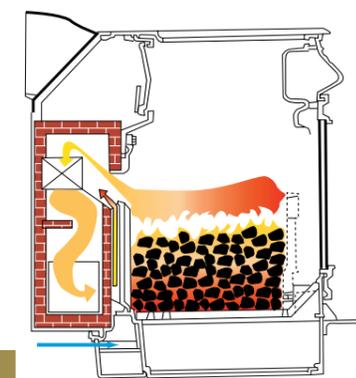

2

Feed it with wood logs, and adjust the primary air entry in order to get the wished combustion. Once the temperature reach 260°C, close the damper. The secondary catalytic combustion is activated, the gases burn trough the catalyser.

3

The primary and secondary fresh air entries are adjusted to get the wished heat release. The secondary combustion continues inside the catalyser.

4

The volatile gas combustion is almost complete. The heat release goes on constantly during several hours. Once the ambers bed reduce, open the damper and load again the unit with wood logs.

With a catalyser, the combustion temperature of the smokes switches between 600°C to 260°C. Then the double combustion is much more efficient in time, including at low rate.

It corresponds to the Intrepid II range, for the Federal range the process is slightly different, please refer to the user manual.

ENTER THE WORLD OF SEGUIN !

JOIN
THE **SEGUIN GENERATION** ...
AND STAY IN TOUCH
WITH SEGUIN :

Ideal to guide you towards the best choice for your fireplace, cooker, wood stove or pellet stove, **Seguin iPhone/Android application** can be downloaded free of charge on Apple Store and GooglePlay (key words : cheminée or Seguin).

Simple and practical, the optimized version is available on Smartphones and tablets under iOS and Android.

FEATURES :

- **Collection:** discover and find our products : fireplaces, stoves and cookers.
- **Simulation:** virtually try one of our appliance at your home thanks to the augmented reality. Choose a model, take a picture, adjust, save, and share.
- **Location:** Find your nearest store , find the contact information, locate it on a map and calculate the route.
- **Information:** receive information, an appointment, a quote , whenever you want, wherever you are .
- **Bonus:** make some time for relaxation setting by the fireside, equipped with a double combustion firebox, watching the video sequence as a bonus.

IMPORTANT RECOMMENDATIONS

Stoves give off a large amount of heat. The installation should be carried out in accordance with good professional practice particularly as regards insulation and the distances to be observed during the assembly relatively to inflammable materials. The liability of the manufacturer is limited to the specific guarantee on the various supplied parts making up the stoves. There is good reason to comply with our recommendations delivered with each appliance. The stoves comply with the European norm EN 13240.
